

## **Environmental Purchasing Policy of JHG**

- **Policy:**

We are constantly reviewing standards of procurement to increase the number of environmentally sound products to be used in the hotels.

- **Procedure:**

We are establishing the guidelines and explaining all desirable steps to be taken by the persons in charge of procurement to find and obtain the most environmentally sound products and the best possible conditions.

- **Suppliers:**

- Contact suppliers about environmentally sound products, packages, etc.
- Inform your guests about all the environment-sound products you buy.
- Buy only what the hotel needs.

- **Information to suppliers:**

Inform suppliers about our objectives via “Supplier Info Fax” with Jaz's environmental protection philosophy and a “Thank you” for the cooperation.

- **Ecological Principles:**

The most important ecological principles when buying machines and appliances are:

- Low use of energy.
- Durability.
- Repair and service facilities.

- **Regional Products:**

- Transport ways are shorter.
- Prefer local products and offer them on our buffets.

- Whenever possible, choose suppliers with a certification according to the international ISO norm 9001 (quality management) and/or ISO 14001 (environmental management).

- **Packaging:**

- Avoid over-packaged goods.
- Choose products without packing material.
- Agree with your suppliers on the return of packaging material or its re-use, if possible.

- **Recycled Products:**

Buy products that can either be recycled themselves or consist of materials that can be recycled.

(note paper, napkins, toilet paper made of recycled paper).

- **Fresh Food Items:**

Buy fresh food only, whenever possible.

- **Cleaning Materials and Detergents:**

- Buy environment-friendly cleaners and detergents only.
- We prefer organic fertilizers (e.g., compost).
